### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: independent claim 1 and the dependent claims are allowed because the instant invention discloses a novel gripping collet adapted to be arranged at the end of a draw-through gripper for grasping a thread during the preparation of a woven seam. More specifically, the instant invention requires a gripper body that includes a pneumatic cylinder and a piston that serve to actuate one of two clamping members. One of the clamping members uses two cylinder surfaces that are perpendicular to the pneumatic cylinder and parallel to each other, while the other clamping member uses one cylinder surface also perpendicular to the pneumatic cylinder. The clamping force is created by the pneumatic cylinder that pushes the piston into contact with one of the clamping members forcing it towards the other clamping member to cause the clamping of a thread. This arrangement allows control such that a very high clamping force can be exerted on the thread and on the other hand a very low clamping force can also be exerted on the thread. These limitations are not taught by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
